MANHATTAN BEACH, Calif.--(BUSINESS WIRE)--July 24, 2006--Beach Business Bank (OTCBB:BBBC) (the "Bank") recently installed the Bank's new Image Deposit scanner and software in a doctor's office halfway across the country from the Bank's headquarters in Manhattan Beach, California.

Now Dr. Dean Wright, a very successful dentist in Wichita, Kansas, can make deposits into The Doctors Bank, a division of Beach Business Bank, as easily and quickly as any of the Bank's clients in Manhattan Beach. The Bank's Image Deposit scanner and software process up to 40 checks a minute, and transmit all the scanned checks in a single batch.

Dr. Wright remarked that the new scanner allows him to take advantage of cash management products that can earn or save him thousands of extra dollars a year. "I am recommending this product to all my professional colleagues," he said. "I teach classes on implant dentistry throughout the United States, and I intend to talk about this product at every opportunity possible."

"This product will be a valuable tool in dealing with healthcare professionals nationwide through The Doctors Bank division of Beach Business Bank," said Robert Franko, president and chief executive officer of Beach Business Bank.

Dr. John Philips, the chairman of the board of directors of the Bank, commented, "Doctors across this country have been asking me when The Doctors Bank will be able to take deposits for their operating accounts and this product makes that a reality today. I love telling my doctor colleagues that our first installation was about 150 yards from our office, and the second installation was 1,500 miles away. That really gets a doctor's attention."
